ANIMAL HOSPITAL

MAN, IT'S A
HOT ONE

No doubt about it, this has already been a sizzler of a summer in Sugar Land. It's important to remember that as hot as it is for us, it's even hotter for our pets. Animals often struggle to keep cool because they don't process heat as effectively as we do.

During these hot days, make sure to exercise your pet in the cooler morning and evening hours, provide plenty of cool, fresh water and shade, and never leave your pet unattended in a vehicle, not even for a few minutes.

Also, know the warning signs of heat stroke and exhaustion. They include:

- Anxiousness
- Excessive panting
- Restlessness
- Excessive drooling
- Unsteadiness
- Abnormal gum and tongue color

These symptoms can quickly advance to seizures, collapse, vomiting and bloody diarrhea. If your pet exhibits any of these symptoms, call us immediately at [281-644-0463](tel:281-644-0463).

WE'LL RUB YOURS.

Have you heard about our referral program? If you refer a client to us and they schedule an exam, **they will get \$25 off—AND—you will get a \$25 credit!**
It's that simple.

So, tell your family members, neighbors, mail carriers, tailors, barbers, hair stylists, locksmiths—anyone who has a pet. Send them to us for expert pet care and reap the rewards!
